

Guide to Our Solid Fuels

Supreme Polish

Our Supreme grade coal gives a high heat output and low ash content.

This is the highest quality coal available on the market and is ideal for open fires.

Polish Doubles

Our Polish Doubles give high heat output with little ash. Polish Doubles are ideal for stoves and open-fires with back boilers due to their size and higher calorific values.

Polish Special

Our Polish Special is a blend of Supreme Polish & Premium Polish. It gives a high heat output and low ash content & is ideal for burning in open fires.

Premium Polish

Our Premium Polish gives reasonable heat output and low ash content. This coal is very well priced and is ideal for open fires.

Smokeless Coal

Our Smokeless ovoid blend of Pet Coke and Union Nuggets is suitable for use in both open fires and closed appliances alike with an attractive flame and low ash content.

Stove Nuggets

Top Quality Smokeless Stove Fuel. Easy ignition with consistent heat. Great for banking down overnight in a closed appliance as they burn out completely.

Smokeless Special

Our Smokeless Special is a blend of smaller size Pet Coke and Union Nuggets. It is suitable for use in both open fires and closed appliances alike with an attractive flame and low ash content.

Cosy Glo

Cosy Glo is a Smokeless fuel for multi fuel stoves & open fires. It's easy to light and clean burning with low ash content. It is similar to Ecobrite but is bigger in size.

Eco-Brite

Low ash and high heat fuel with consistent quality, guarantees value for money and minimum fuss. Made for use in closed appliances & Multi-Fuel Stoves. Ecobrite is a HETAS Approved Fuel

Singles & Slack

Singles are about half the size of Polish Doubles and are used for 'banking down' your fire. Slack is an even smaller form of polish coal is used similarly to Singles for 'banking down' your fire. Both can also be used in stoves and open Fires
